Mr. Peter Samson,
Human Resource manager
MyJobMag Limited
7 Atunwa street,
Opebi,
Lagos.

Dear Mr. Peter,

It is with great excitement that I apply for the position of Mechanical Engineer at MyJobMag Limited. As a mechanical engineer with over 6 years' experience in the field, I believe that my extensive experience in working with 3D CAD software and execution of light-weight materials will contribute greatly to the growth of the company.

Over the years of working as a mechanical engineer, I have been able to develop great skills like;

- Attention to details
- Precision in the handling and manipulation of fragile materials

Working as a manager with AD Construction Company over the past two years, I have been able to develop leadership qualities to lead the team, and project management skills too. During my time at AD construction, I was awarded as the best staff of the year due to my communication skills having worked as the liaison between different teams including design, production, and quality assurance. Working in different engineering sectors also has given me a broad knowledge of engineering which will go a long way to contributing to the growth of the company.

What attracts me most to your company is your concern with the healthcare industry. All my life I have looked forward to working as engineer to affect the healthcare sector. Being a part of MyJobMag Limited will help me achieve that goal to a large, and will also help me to be a part of a functional system like MyJobMag Limited.

I would appreciate a scheduled time for us to discuss about how I fit into the job role and company. Thank you for the consideration.

Sincerely,

John Ayomide
